

**Ellen M. Berggren, U.S. Army Corps of Engineers, Institute for Water Resources**

Ms. Ellen Berggren is a member of the U.S. Army Corps of Engineers (USACE) National Flood Risk Management Program team at the Institute for Water Resources, and Deputy for the USACE National Silver Jackets program. In her current position she works with state Silver Jackets teams to promote collaborative interagency flood risk management efforts and builds partnerships at the National level with other Federal agencies and organizations to support state team efforts. She joined USACE in 2008, managing flood risk management, water supply and ecosystem restoration planning studies; developing interagency partnerships; and initiating the Idaho Silver Jackets team. Her career spans more than 30 years as a planner and project manager for Federal and State agencies and the private sector, leading collaborative and interdisciplinary processes to find solutions to water resource challenges. Ms. Berggren received a B.S from Arizona State University in Environmental Planning and Landscape Architecture and a M.S. in Interdisciplinary Studies, with a Water Resources and Public Policy emphasis from Boise State University.
