Rear Admiral Landry Approves "Top Kill" Procedure

Federal On-Scene Coordinator Rear Admiral Mary Landry, acting on the validation of government scientists and in consultation with the National Incident Commander Admiral Thad Allen, has granted approval for BP to begin proceeding with their attempt to cap the well using the technique known as the "top kill."

This expedited step provides the final authorization necessary to begin the procedure.

The Department of Energy's Scientific Response to the Oil Spill

Secretary Chu and the Department of Energy's National Laboratories are providing round-the-clock scientific support to help inform strategies to stop the BP oil spill. Secretary Chu and his team of scientists are brainstorming ideas about the most effective scientific and engineering approaches to the problem, providing expert advice and technical support validation, testing assumptions and making engineering calculations to help BP think through their approach.

THIS CLIMATE OF OURS

WHY THESE OPEN WINTERS AND TEMPERATE SUMMERS?

THE GEOLOGICAL EVIDENCE OF THE ALTERNATE PREVALENCE OF A SEMI- TROPICAL ATMOSPHERE.

Is our climate changing? The succession of temperate Summers and open Winters through several years, culminating last Winter in the almost total failure of the ice crop throughout the valley of the Hudson, makes the question pertinent. The older inhabitants tell us that the Winters are not as cold now as when they were young, and we have all observed a marked diminution of the average cold even in this last decade. Who ever expected to see another importation of ice from Norway after that of ten years ago? Yet, incredible as such a thing would have seemed only a year ago, it actually happened last week.

گھر بنانے کا مناسب طریقہ:

سرے کو مضبوطی سے جوڑنا تاکہ ستون دیوار اور چھت آپس میں پوسٹ ہو جائیں۔

گھر بنانے کا غلط طریقہ:

- سرے کا غلط استعمال: یعنی دیواروں یا ستونوں اور چھت کے درمیان جوڑوں کا کمزور ہونا یا صحیح نہ ہونا۔
