

***ON RELATIONSHIPS BETWEEN CLIMATE
CHANGE RESPONSES AND NATURAL
HAZARDS AND DISASTER RISK REDUCTION***

Tom Wilbanks

Natural Hazards Workshop

Broomfield, CO

July 11, 2010

Conceptual Linkages Are Strengthening:

- **As both communities increase their attention to multi-hazard contingencies and resilience**
- **As climate change adaptation research and practice move toward a risk management paradigm**
- **As DRR research and practice increase their attention to pre-disaster vulnerability reduction as well as post-disaster coping**

ACC Included Some Representation of the Hazards Response Research Communities:

- **The Adapting Panel included Bob Kates, Howard Kunreuther, and Bruce Baughman**
- **The Informing Panel included Kathleen Tierney**
- **All panel deliberations included attention to the natural hazards/disaster risk reduction research literatures, wherever relevant**

IPCC Has Shown Leadership in Promoting Stronger Collaboration:

- **A Special Report is under way:**
 - **Entitled "Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation" (SREX)**
 - **Includes Susan Cutter, Allan Lavell (FLACSO), and Gordon McBean as CLAs, and such others as Silvia Llosa, Andrew Maskrey, and Robert Muir-Wood as LAs**
 - **Report due out in mid-2011: external reviews of drafts begin this summer**
