Equitable Engagement with Underserved Communities: An Update on State and Local Mitigation Planning Guidance and Research

This session will open with an overview of the changes to FEMA’s mitigation planning policies, with a focus on how state and local governments can leverage their planning process to advance social equity and resilience goals. This will be followed by a summary of resources available from the Natural Hazards Center regarding effective risk communication and building partnerships with socially vulnerable populations. The Natural Hazards Center will then share some preliminary research results regarding the inclusion of social vulnerability and vulnerable populations in State Hazard Mitigation Plans.
