As continuing floodplain development and climate change drives U.S. flood risk, retreat—removing development from and relocating people out of high flood-risk areas—is an increasingly necessary and widespread practice.

This presentation will use the findings from two recent studies on floodplain buyout implementation practices to discuss opportunities to reduce costs, increase the speed with which buyouts are made available to prospective participants, and increase equity in floodplain buyouts.

FEMA

Floodplain Buyout Implementation: Activities, Costs, and Opportunities for Improvement

Tuesday, October 11, 2022

11:00 to 12:00 p.m. MDT

Will Curran-Groome
The Urban Institute

Will Curran-Groome is a research associate with the Urban Institute's Metropolitan Housing and Communities Policy Center. His work spans climate adaptation and retreat, supportive housing systems, land use regulation, housing affordability, active transportation, and public health. Curran-Groome's research on floodplain buyouts examines how funding and policy mechanisms influence buyout costs and quality and points to opportunities to improve project outcomes and to make buyouts more widely available.
