NATURAL HAZARDS WORKSHOP

Since 1975, the Natural Hazards Center has hosted the annual Natural Hazards Research and Applications Workshop. The Workshop draws together researchers, private and public sector practitioners, and policy makers concerned with reducing the harm and suffering caused by disasters. Nearly 650 people attend this meeting each summer in Colorado. The Workshop is widely known for helping people to make connections between research and practice and for building bridges across disciplines and organizations.

RESEARCHERS MEETING & PRACTITIONERS MEETING

Both the Researchers Meeting and the Practitioners Meeting are convenings that follow the Natural Hazards Workshop. These add-on meetings bring those segments of our community together for focused sessions. The Researchers Meeting offers presentations of ongoing and recently completed research while the Practitioners Meeting focuses on the latest developments in mitigation policy and practice.

50TH ANNUAL NATURAL HAZARDS WORKSHOP

Workshop

July 13 to July 16, 2025

Researchers Meeting
