## INNOVATIONS AND TECHNIQUES THAT CENTER JUSTICE IN DISASTER RECOVERY

### ABOUT THE DJN

The Disaster Justice Network (DJN) is a volunteer network comprised of disaster recovery specialists of all ages, organizational types—from community and non-profit staffs, faith leaders, university students and senior faculty and more. DJN was initiated by grassroots efforts, including a Natural Hazards Center Quick Response grant, in response to the devastating hurricanes that struck Lake Charles and Southwest Louisiana in 2020 and Terrebonne, Lafourche, Jefferson, and Plaquemines Parishes in Louisiana in 2021. The impact of these storms was overwhelming. The recovery is very slow. The network concept was applied because the human resources were scattered in many organizations that we believed would benefit from coming together weekly to describe their work and seek counsel from others in other organizations as to how to make their efforts most effective. The activities, projects, and programs on the poster list reflect some of the DJN participants' efforts toward a justice-driven disaster recovery.

To learn more about these efforts, scan the QR codes on this poster or take a handout about the work carried forward by those pictured in the Zoom replica. We welcome you to be in touch with the initiators of these efforts. They look forward to connecting.
